KEYWORD INDEX

acetylcholine release, 175
acetylcholinesterase, 473
adenosine, 175
adrenergic control, 115
age, 103, 175
age-associated diseases, 391
age-associated pathologies, 223
aging markers, 435
aging, 5, 19, 25, 43, 115, 151, 189, 197, 211, 245, 271, 309, 349, 369, 399, 429, 435, 473, 481, 491
androgen, 359
antibiotic-free, 35
arteriosclerosis, 5
ATP, 25
autofluorescence, 97

basic aging processes, 391
behavior, 281
biological age, 435
biomarker, 245
biomarkers of aging, 223, 359, 391
biomarkers, 271, 297, 369, 387, 429
body composition, 455
brain aging, 161
brain electrical activity, 161
brown adipose tissue, 455
buthioninesulfoximine, 81

caffeine, 175
calcium transport, 25
calcium, 399
calories, 189
cancer, 5
cell aging, 297
cell cycle distribution, 43
cellular aging, 81, 87
centrophenoxine, 161
cerebral cortex, 175
choline acetyltransferase, 473
cholinergic system, 473
chromolipids, 97
chronic undernutrition, 417
chronological age, 223, 391
circadian rhythms, 43
clonal life span, 501
coacervates, 97
coenzyme levels, 327
collagens, 5
computers, 369
connective tissues, 5
cortisol, 151

Darwinian fitness, 445
death rate, 501
development, 281
diabetes, 5
dietary restriction, 189
DNA synthesis, 297
DNA, 271
dog, 151
dopamine, 481
Drosophila melanogaster, 59, 491

early components of fitness, 491
elastin, 5
electron microscopy, 197
endotoxin, 103
energy charge, 327
enzyme modification, 327
enzyme regulation, 327
enzyme thermolability, 87
estrogen, 359
evaluate antiaging treatments, 309
evolution, 445
evolutionary explanation, 445
extracellular matrix, 5

fecundity, 491
feedback control, 377
fertility, 359
fever, 103
fibronectin, 5
fission rate, 501
flow cytometry, 43

G-proteins and aging, 327
gastric mucosal atrophy, 463
gastric secretion, 463
gene expression, 271
genes, 245, 445
genetic program, 281
genetics of aging, 59
gerontology, 445
glands, 197
glutathione, 81
gluthione, 211
Gompertz, 281
granular convoluted tubules, 197
growth hormone, 377
growth rate, 87

heart rate, 115
hemopoiesis, 43

histidine decarboxylase, 463
hormones, 377
human diploid fibroblast, 81
hypothalamus, 349, 481

immunity, 387
in vitro life span, 81
insects, 211
insulin, 377
intensity of selection, 445
interleukin-1, 103
interventions in aging, 223
intramuscular nerves, 127
isolated heart, 115

life history trait, 281
life span, 211, 281, 435
life tables, 445
lipid pigments, 97
lipofuscin, 97, 197
long-lived strains, 59
long-term treatment, 87
longevity, 491

maximum life span, 391
metabolic efficiency, 59
metabolic potential, 59
metabolic rates, 59
metastasis, 5
mice, 197
microspheres, 183
mitochondria, 25, 35
multiple unit activity, 161
muscarinic receptors, 473
muscle blood flow, 183

N-acetylcysteine, 81
$NAD(P)^+/NAD(P)H$ ratios, 327
natural populations, 445
natural selection, 445
nervous system, 399
neuroendocrine system, 349
neuronal arborization, 399
norepinephrine, 377, 481
nucleic acids, 189

old mice, 127
oxidative stress, 211
oxygen free radicals, 211

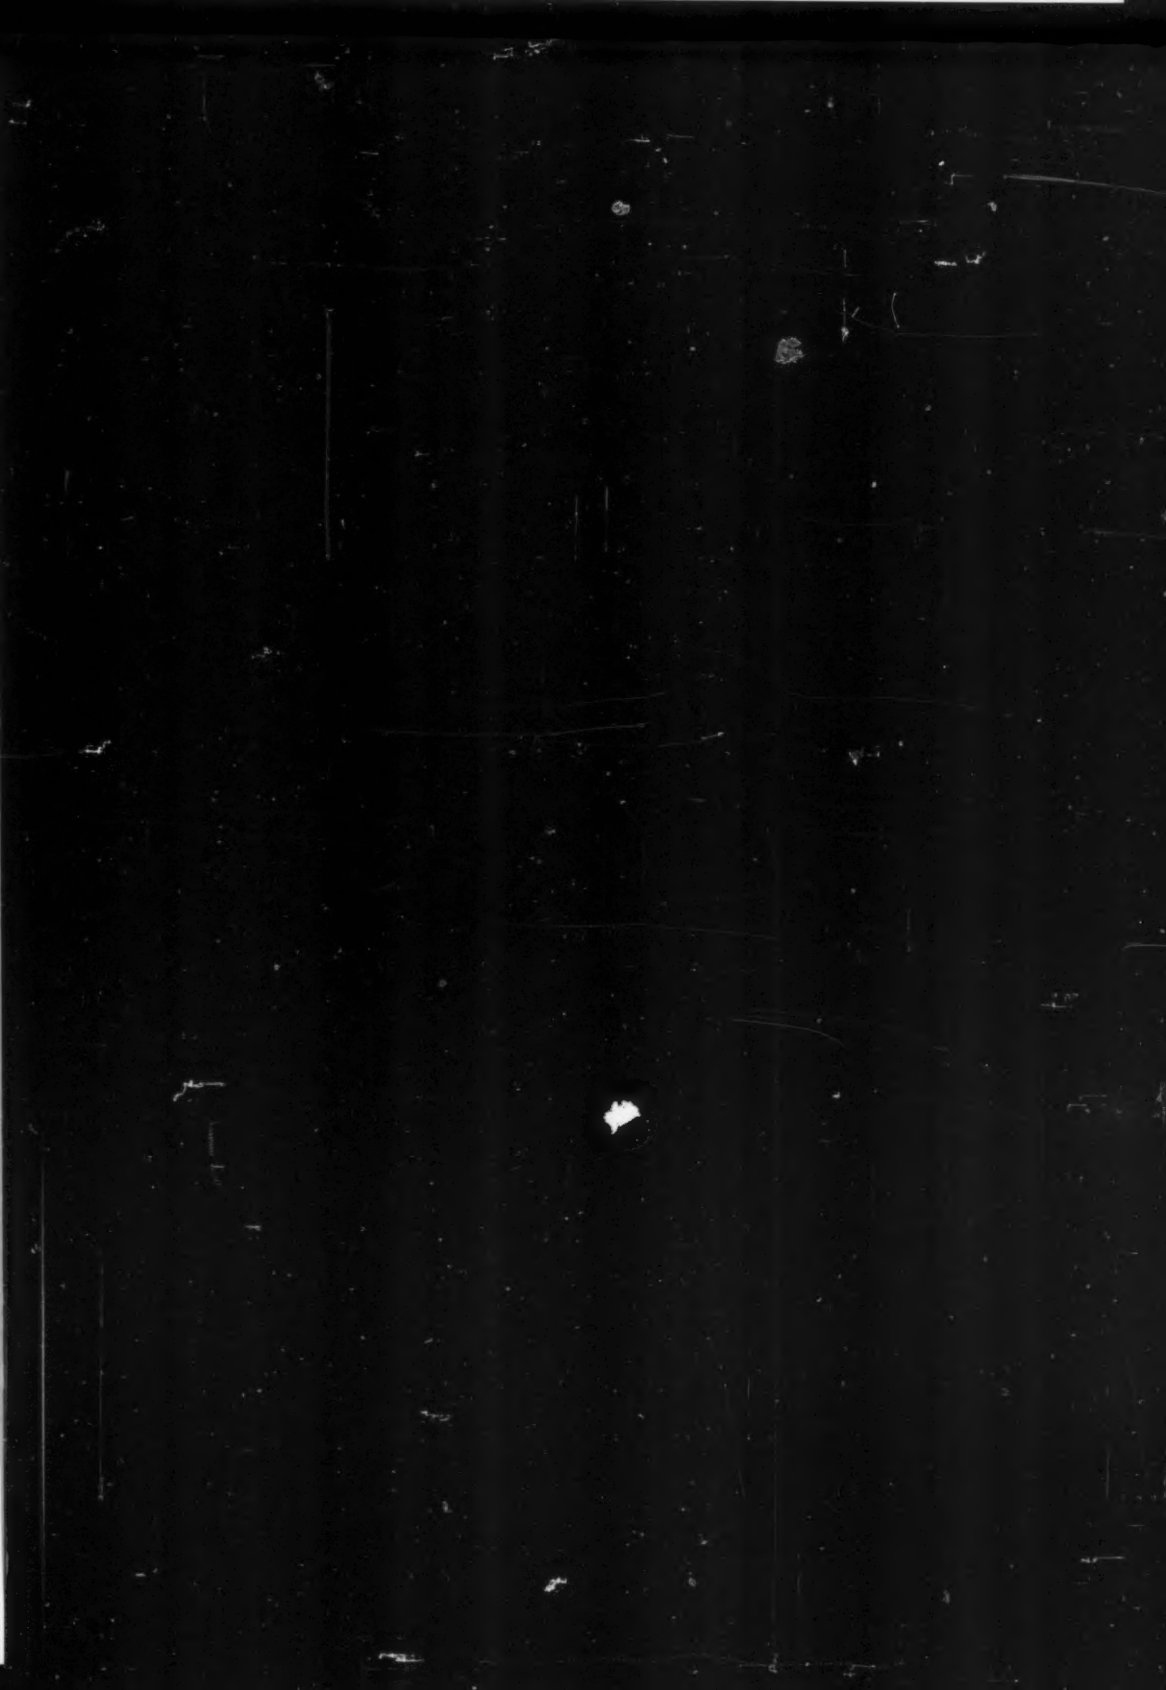
paramecium, 501
parietal cerebral cortex, 161
parotid, 197
pentagastrin, 463
perioral muscles, 97
peroxides, 211
phosphatidylcholine, 19
physiological age, 223, 391
physiological change, 309
pigment, 97
pigmented granules, 97
plasma membranes, 19
predictors of functional capability, 223
predictors of mortality, 391
procaine, 87
proliferative capacity, 297
prostaglandin E, 103
protein and RNA syntheses, 35
protein oxidation, 327
protein phosphorylation, 327
protein turnover 327
protein, 189
psychometrics, 245
puberty, 59

quantitative genetics, 281

rat brain, 473
rat, 455
rate of living, 59
rats, 189, 349, 417
receptors, 377
recombinant inbred, 281
reliability, 245, 429
replicative aging, 271
reproduction, 281, 349
RNA, 271

seasonal differences, 43
senescence, 271, 281, 435, 445
sensory-motor function, 417
serotonin, 481
6-hydroxydopamine, 115
skeletal muscle fiber types, 183
species longevity, 223
sphingomyelin, 19
sphingomyelinase, 19
statistics, 369
strain effects, 309
stress, 417
submandibular, 197
substrate cycling, 327
synaptic transmitters, 399

T cells, 387
testosterone, 377
theophylline, 25
thermogenesis, 455
thermoregulation, 455
thyrotropin, 151
thyroxine, 151
tumors, 349

ultrastructure, 127


validity of biomarkers, 223
validity, 245, 429
virgin female Fischer 344 rat, 183
vitamin E supplementation, 501
